

IAP transposable-element copies — UMAP of 6-mer composition, colored by consensus divergence

IAP UMAP - distance to global consensus
overall mu = 48.9% (N = 2,796 good copies)

IAP UMAP - distance to cluster consensus
overall mu = 29.7% (N = 4,185 good copies)

HDBSCAN/UMAP cluster — mu = mean Kimura distance to global (mu_g) / cluster (mu_c) consensus
